Lio

Acme procurement Case study

Quote review, catalog guidance and approvals

William Bittner / 2 November 2026

Lio

What I built

01 **More dependable extraction**

OCR, missing fields and safer quote totals.

02 **Quote review and alternatives**

Compare the PDF, edit items and swap options.

03 **Negotiated catalog suggestions**

Show and inspect relevant supplier prices.

ACME POLICY

Rules and approvals

Apply Acme’s category rules and auto-approve requests below €2,000.

Recheck approval when request details change.

Lio

PDF extraction: what changed

1

Image text via OCR

Read image-based supplier details locally.

2

Missing fields

Keep useful results when the VAT ID is missing.

3

Alternative items

Keep options separate from base order lines.

4

Quote totals

Preserve quoted totals and discounted prices.

Examples: styleGREEN image text and Gärtner Gregg alternatives.

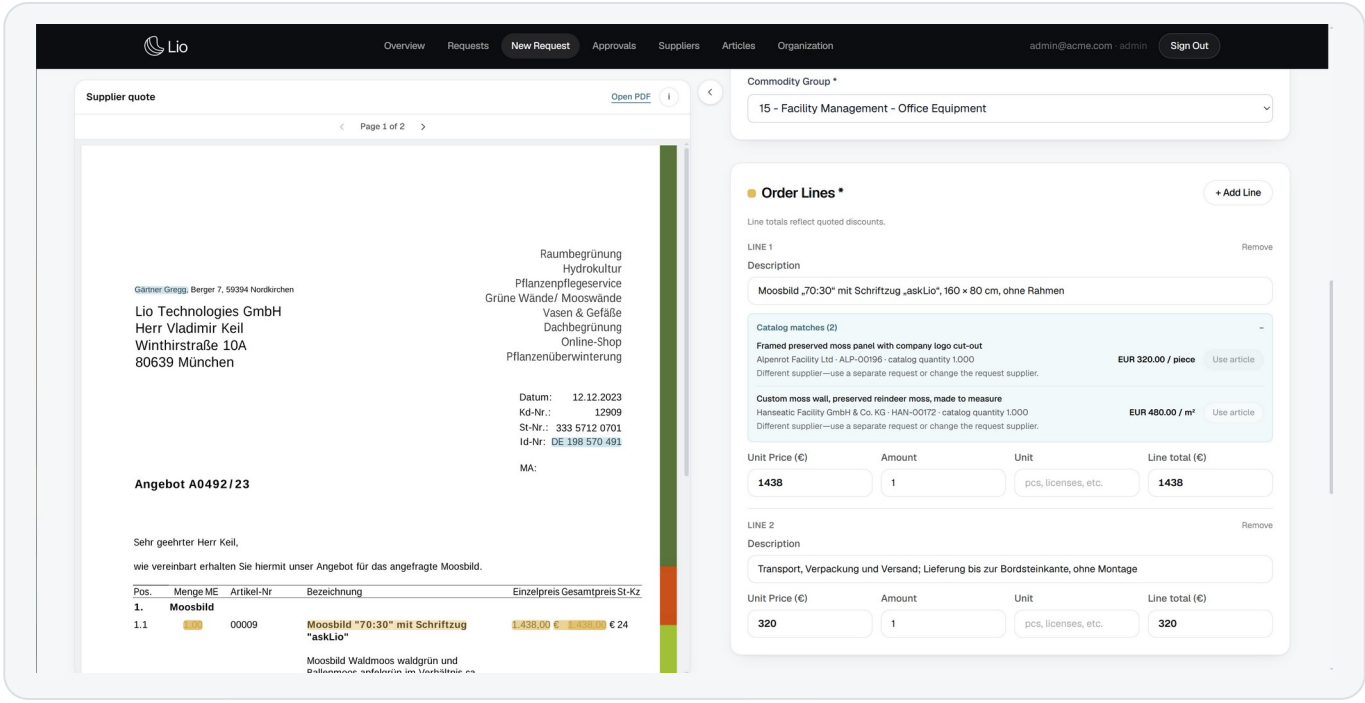

Lio

Quote review: what I added

A hideable PDF view sits beside the request form.

Users can add or swap alternatives and review the total and VAT.

Highlights link likely PDF matches to the form for review.

Lio

Catalog guidance and Acme categories

Catalog suggestions

I added organization-scoped matches showing supplier, unit and negotiated price.

Requesters can open an article and apply a compatible supplier’s price.

Customer-specific categories

Cable ties	**Electrical Engineering**
Printer toner	**IT Hardware**
Monthly software subscription ≤ €20	**Office Supplies**

The €20 limit and tax basis need Acme’s confirmation.

Lio

Access and approval changes

Requester	Creates and sees their own requests
Buyer	Reviews requests and can approve their own
Admin	Buyer capabilities plus member, data and settings management

ACME THRESHOLD

< €2,000

Automatically approved

€2,000 and above: manual approval.

Changes to request content trigger the approval check again.

Lio

How I checked the changes

01 **15 quote extractions**

Five PDFs, three runs each. Gross totals and line price patterns matched.

02 **styleGREEN OCR**

All three runs recovered the supplier and VAT ID.

03 **Automated tests**

72 backend tests passed, alongside frontend and type checks.

Still needs review

Five PDFs are a small sample. VAT breakdowns and source matches still need review.

Lio

What I would do with more time

01 **Evaluate extraction quality**

Score real quotes, including scans and difficult cases.

02 **Rejection reasons and resubmission**

Show requesters why a buyer rejected a request.

03 **Better catalog matches**

Find relevant products across languages and check units and contract terms.

04 **Configurable customer rules**

Set approval and category policies for each organization.
